

BadenEnergy

BadenEnergy is the new European tech innovation summit for clean energy and decarbonisation, and will take place for the first time on 7 and 8 April 2027 at Trafo Baden.

How can energy systems become more resilient and sustainable, whilst digitalisation and artificial intelligence continue to drive up energy demand? This is precisely where BadenEnergy comes in.

The summit showcases what sets Baden apart as a business location: energy expertise, a strong engineering cluster and international networking. The city of Baden is therefore one of the founding partners, alongside the companies based here: ABB, Accelleron, GE Vernova, HARTING, Hitachi, Schneider Electric and Trafo Baden.
