

Health Innovation Hub Aargau

Promoting innovation in Baden in the fields of digital health, medtech, pharmaceuticals and healthcare: This is the aim of the [Health Innovation Hub Aargau](#).

The pilot project was launched in 2023 by Baden Cantonal Hospital, the location promotion organisation of the Canton of Aargau and the City of Baden.

With the Health Innovation Hub Aargau, players from the clinical, research and business sectors can be even better interlinked. For example, the hub is already cooperating with ETH Zurich and the FHNW. With the aim of establishing a strong start-up and product development scene, the project also contributes to value creation and the creation of jobs in Baden and beyond.

The annual networking event "[Über den Tellerrand](#)", which is organised by the city of Baden in collaboration with the Health Innovation Hub Aargau, offers a practical insight into the developing health and medtech scene in the Baden region.
