

Services

Contact Private Enterprises is active at a local level in promoting good economic framework conditions and ideal networking opportunities for resident or newly arrived companies. In coordination with the cantonal high-tech initiative and various partners from the business community, we are putting the city's development strategy into action in a variety of sectors.

We focus on positioning Baden's export-oriented economic hub in a nationwide context. We also advise residents and new arrivals with regard to their public service requirements and can facilitate business premises and contacts. Our team represents the concerns of the business community in administrative circles.

We look forward to hearing from you.
